TechAkili Technologies Pitch Deck

Title: TechAkili Technologies – Bridging the Digital Skills Gap **Subtitle:** AI-Powered Learning & Software Solutions

Problem Statement

The Challenge:

- The digital skills gap is widening, limiting career opportunities and business growth.
- Lack of hands-on training and industry-relevant expertise in emerging technologies.
- Businesses struggle to build scalable, custom software solutions.

Our Solution

TechAkili Technologies Provides:

- AI-powered learning with interactive courses designed for practical application.
- Hands-on labs that simulate real-world industry scenarios.
- Expert mentorship from industry professionals to guide learners.
- Custom software development services tailored for businesses.

Our Key Offerings

- Interactive learning covering AI, Cloud Computing, Cybersecurity, Networking, and Software Development.
- Hands-on labs that provide real-world industry experience.
- AI-powered learning tools for personalized guidance and automated assessments.
- Expert mentorship and coaching from top professionals.
- Custom software solutions built for scalability and efficiency.

Market Opportunity

- The global demand for digital skills is increasing, with millions of job openings in tech industries.
- The e-learning market is projected to exceed $400 billion by 2027.
- Businesses require innovative and scalable digital solutions to stay competitive.

Business Model

Revenue Streams:

1. Subscription-based courses and certifications.
2. Corporate training programs.
3. Custom software development contracts.
4. Strategic partnerships with educational institutions and businesses.

Competitive Advantage

- AI-powered adaptive learning ensures a personalized educational experience.
- Practical, industry-relevant training prepares learners for real-world challenges.
- A global network of experts from top technology hubs provides mentorship and guidance.
- Comprehensive end-to-end software development solutions.

Our Courses

- Software Engineering
- Data Science and Artificial Intelligence
- Cloud Computing
- Cybersecurity
- Networking

Each course includes:

- Comprehensive learning materials including videos, PDFs, and code snippets.
- Hands-on projects and labs for practical experience.
- Industry-recognized certifications that enhance employability.

Partnerships & Collaborations

- Partnerships with TVET institutions, universities, and enterprises to provide digital training.
- Internship and apprenticeship programs for hands-on industry experience.
- A seamless partner onboarding process for educational institutions and businesses.

Careers & Internships

- Internship programs designed for students and graduates to gain real-world experience.
- Industry attachment opportunities with leading companies in Kenya and internationally.
- A streamlined application portal for aspiring tech professionals.

Meet Our Team

- A diverse and experienced leadership team with expertise in AI, cybersecurity, software engineering, and business development.
- Professionals from the US, UK, Germany, and France driving innovation and impact.

Testimonials & Success Stories

- "TechAkili transformed my career with hands-on AI training." – John, Data Scientist
- "Our company leveraged their software solutions to scale operations efficiently." – Jane, CEO
